INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating

The tank assembly may be placed above, below or alongside (preferred) of the assembly

Install vertically with cartridges hanging down

Allow 2-1/2" (6.35 cm) clearance below the cartridge for easy cartridge replacement

The water inlet must supply a minimum of 40-100 psi (2.7-6.9 bar), non-shock

OPERATION TIPS

Replace the Everpure prefilter and postfilter carbon cartridges every 12 months. Everpure ROM-G75 RO membrane cartridge every two (2) years, or as needed.

System Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the performance data sheet or at www.NSF.org

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.
