EVERPURE

PURE CONVENIENCE

CTS-H54

COUNTERTOP DRINKING WATER SYSTEM

Enjoy fresh, clean, trusted water virtually anywhere with a Pentair Everpure CTS-H54 Countertop Drinking Water System.

This system features trusted, commercial-grade filtration technology in a design smaller than most home coffee makers. While compact in size, the CTS system boasts full-size capability to effectively reduce harmful contaminants, off-tastes, and odors.

Enjoy with confidence

The trusted, commercial-grade filter traps particles down to 0.5 micron in size - roughly 200 times finer than a human hair.

Easy installation

Enjoy the full benefit of clean, crisp water in seconds. Simply add the user-friendly system connector to your existing faucet to begin indulging in Everpure water.

Easy maintenance

A built-in flow monitor tracks water usage and illuminates a multi-color LED light when the filter cartridge needs to be changed. Easily replace the exhausted cartridge with a new one in moments.

A HEALTHY DIFFERENCE

Instantly enhance the quality of your water with a CTS-H54 Countertop System.

- 1. Enhanced flavors.** Experience the true flavor of coffees, teas, soups, pastas and more.
- 2. Sustainable solution.** One CTS-H54 filter system can eliminate nearly 3,500 plastic water bottles a year! This helps your family save money and reduces the environmental impact.
- 3. Quality water.** Enjoy the same quality water national restaurant and coffee chains have experienced for decades. Taste the difference in every sip of Everpure water.

SOPHISTICATED ENGINEERING

Exclusive precoat technology combines Micro-Pure filtration media with a unique pleated filter membrane. Combined, the filter reduces several contaminants while maintaining healthy, vital minerals naturally found in your water. The replaceable filter cartridge is a sleek, aluminum canister lined with commercial-grade polymer to prevent metallic aftertastes.

The Everpure CTS-H54 system is certified to reduce the following contaminants to provide your family with clean, healthy water.

- Lead
- NSF/ANSI Standard 53 certified to reduce cysts such as *Giardia* and *Cryptosporidium* by mechanical means
- Chlorine taste & odor
- Dirt and cloudiness*
- Mold and algae*
- Oxidized iron*
- Oxidized manganese*
- Oxidized sulfides*
- Particles 0.5 micron in size by mechanical means
